

Founded in October 1981 by Walter Merkli, Texpart Technics is now celebrating 40 years of supplying precision parts to our clients worldwide. What started from humble beginnings in the attics of the family home with a handful of local customers and suppliers has grown to a sizeable business with touchpoints around the world.

With external factors such as COVID-19 or material shortages in some areas, delivery security has become increasingly important over the past years and has had our team of procurement specialists focus on as a matter of priority. Today, we also offer production solutions in Malaysia and India, of course with the same high production standards as in our home market, Switzerland. Additionally, we can pair these solutions with Swiss safety productions and storage of parts for up to 24 months, free of charge.

We are thrilled to celebrate this milestone with our employees, customers, suppliers and business partners alike.

Here's to another 40 years of high precision solutions!

PS You too can benefit from our individual service – send us your requirements today!
